CHAIRMEN'S WELCOME

OUR TEAM OF EXPERTS AT SHAW REGIONAL CANCER CENTER IS DEDICATED TO DELIVERING THE MOST ADVANCED AND PERSONALIZED CANCER CARE TO OUR PATIENTS.

We are proud to have been reaccredited with commendations by the American College of Surgeons Commission on Cancer because it shows that we stand with the top cancer care providers in the country. Shaw has also received the Quality Oncology Practice Initiative certification. Together, these accreditations and certifications speak to the quality and excellent care patients receive at Shaw. In addition, we continue to grow and add services to meet the evolving needs of our patients and their families.

This booklet provides a window into the care at Shaw Regional Cancer Center. National data shows that Shaw has a 5-10% increased survival rate over other cancer centers in the United States. We believe this is due to our multidisciplinary team approach, a state-of-the-art treatment facility and our attention to survivorship care.

We hope you enjoy learning more about our team and the communities we serve.

PATRICIA HARDENBERGH, MD

Co-Chairman, Cancer Committee
Medical Director, Radiation Oncology

ALEXANDER URQUHART, MD

Co-Chairman, Cancer Committee
Medical Director, Medical Oncology

SHAW CANCER COMMITTEE

The Shaw Cancer Committee meets quarterly to review our goals and progress on prevention, treatment and survivorship. The committee integrates physician specialists with other cancer care professionals who contribute to ensuring that Shaw provides the absolute best care possible.

PATRICIA HARDENBERGH, MD Radiation Oncology / Cancer Committee Co-Chairman
ALEXANDER URQUHART, MD Medical Oncology / Cancer Committee Co-Chairman / Cancer Conference Coordinator

SHAW REGIONAL CANCER CENTER

THE PERFECT PLACE TO CONQUER CANCER

What brings patients to Shaw Regional Cancer Center is our impeccable reputation, esteemed doctors and top-of-the line equipment — including an Image Guided Radiation Therapy (IGRT) Linear Accelerator and 3D Mammography. But it's the rest of the care, courtesy of a dietician, exercise physiologists, genetic counselor, nurse navigator and a complimentary 12-room cancer caring lodge in a stunning setting, that keeps everyone's spirits lifted to their absolute peak.

Shaw Regional Cancer Center was made possible by the generous donation of Hal and Mary Louise Shaw. The Cancer Center was completed in 2001 and has continued to grow through support of the Shaw family, Shaw Outreach Team, Sonnenalp of Vail Foundation, Pad the Bra, Vail Breast Cancer Awareness Group, and countless additional dedicated community members and groups.

WHAT MAKES SHAW UNIQUE

Patients travel from around Colorado and the country to receive the unique, personalized care Shaw offers in the healing setting of the Rocky Mountains. People who can choose to receive their treatment anywhere in the world are choosing Shaw.

SURVIVORSHIP PROGRAM

The staff at Shaw believes in treating each patient's body, mind and spirit. Funded by proceeds from Pink Vail™ — the world's biggest ski day to conquer cancer — "Spirit of Survival" is a progressive program designed to improve life and survivorship through exercise training, nutrition counseling, emotional support, outdoor camps... and a little bit of pampering.

▶ **FITNESS & RECREATION** (970) 569-7493

Offers customized workouts and boot camps developed by our specialized exercise physiologists in our on-site gym; yoga, tai chi, stretch & relax and Pilates in our Jack's Place studio; and outdoor adventures in beautiful Colorado.

▶ **NUTRITION** (970) 569-7614

One-on-one counseling, cooking demonstrations and educational opportunities with our registered dietician, who specializes in oncology nutrition.

▶ **EDUCATION AND GUIDANCE**

Provided by our social worker, staff oncology nutritionist, nurse navigator, medical librarian and others.

▶ **COUNSELING & EMOTIONAL SUPPORT**

(970) 569-7606

Shaw patients are not alone on their cancer journey. Our cancer support programs address the issues of cancer treatment and help patients, their family and/or caregivers understand and better cope with the challenges of the disease. In addition to the multitude of support group options, Shaw also offers one-on-one counseling and pastoral services for patients and their families 24 hours/day, seven days/week.

▶ **SHAW OUTDOOR ADVENTURES**

Adult cancer survivors and fighters are empowered through conquering outdoor challenges including hiking, snowshoeing, hut trips and more.

▶ **NURSE NAVIGATOR**

Creates a seamless experience by lining up appointments and guiding patients to the appropriate resources. Our navigator also facilitates communication among the patient's multiple providers.

▶ **SLIM FOR SURVIVAL**

This cancer prevention program provides a targeted nutrition, exercise and emotional support program designed to help survivors achieve weight loss, improve their health and enhance their overall well-being.

▶ **SURVIVORSHIP CARE PLANS**

Shaw Regional Cancer Center has developed a Survivorship Care Plan, which is a summary of treatment for patients to guide their care after initial treatment is finished. It is meant to provide clear designation of who is responsible for the various aspects of care and optimize care coordination, avoid unnecessary use of resources, and ensure that care does not "fall through the cracks." The Care Plan includes follow-up schedules for visits and testing, as well as recommendations for early detection and management of treatment-related effects and other health problems.

▶ **WELLNESS SERVICES**

Shaw offers massage, acupuncture and reiki sessions to patients and caregivers to alleviate the symptoms of cancer treatment. Our Expressive Arts program is offered monthly and provides opportunities for art as therapy. In addition, we partner with the American Cancer Society's "Look Good, Feel Better" program to teach beauty techniques.

Jack's Place, A Cancer Caring Lodge

JACK'S PLACE

WWW.SHAWCANCERCENTER.COM/JACKSPLACE
(970) 569-7644

Patients traveling to Shaw for cancer treatment are invited to stay with a caregiver at Jack's Place, a cancer caring lodge. Overlooking the spectacular Lake Creek Valley and peaks of the Sawatch mountain range, Jack's Place features 12 luxurious, private rooms, an inviting common living room, gourmet kitchen, library, yoga and massage rooms. With a pay-what-you-can philosophy, patients and their family or caregiver are invited to take respite at Jack's for the day or overnight, while in active treatment.

PINK VAIL

Pink Vail is the world's biggest ski day to conquer cancer, with proceeds benefiting every patient, not just breast cancer patients, treated at Shaw Regional Cancer Center. To date, the event has raised over \$2.5 million to fund our survivorship program, benefiting all patients at Shaw.

COMMUNITY OUTREACH

Shaw staff and volunteers participate in more than 80 programs and events each year, educating tens of thousands of community members about the importance of cancer prevention and early detection. We partner with the gHealth Fair to provide free or low cost screening services to more than 600 community members in Eagle County. Shaw also provides cancer prevention and early detection education at the Leadville Health Fair.

From events and local festivals to on-campus programming, Shaw extends its unique services and offerings to patients and caregivers seeking truly comprehensive care. Programming includes:

- ▶ Pink Vail (with over 8,000 participants and donors)
- ▶ Tough Enough to Wear Pink at the Eagle County Fair & Rodeo
- ▶ Wheels & Wings at Eagle County Regional Airport
- ▶ Prostate awareness events like "Eat, Drink & Be Manly"
- ▶ Free community lectures such as "What Are You Eating: A Healthy Discussion on GMO and Food" and "Living Longer, Living Leaner"
- ▶ Intern for a Day community tours of the cancer center's facilities

PALLIATIVE CARE

The Palliative Care team at Shaw is available to provide an extra layer of support and coordination to patients and their loved ones as they face the serious and often complex challenges of a cancer diagnosis. Our multidisciplinary team is led by a nurse practitioner and is comprised of doctors, nurses, a pharmacist, social worker, dietician, physical therapist, exercise physiologist and chaplain. They focus on physical, emotional and spiritual health through the duration of cancer treatment. Oncology palliative care is appropriate at any time during a patient's journey with cancer, beginning at the moment of diagnosis. The team pays special attention to addressing physical pain and discomfort, as well as other distress such as depression and anxiety that can stand in the way of patients living their best lives.

Palliative care services can be provided at the same time as curative and life-prolonging treatment, and can include:

- ▶ Expert treatment of pain and other symptoms such as nausea, shortness of breath, fatigue, constipation or changes in appetite
- ▶ Treatment for anxiety, depression or sleeplessness related to cancer diagnosis
- ▶ Spiritual and emotional support
- ▶ Open discussion about treatment choices
- ▶ Family support such as counseling and bereavement education
- ▶ Assistance with advanced planning and medical decision-making
- ▶ Comprehensive information and referral for community resources

GENETIC COUNSELING

Genetics plays an important role in comprehensive cancer care. Shaw Regional Cancer Center offers genetic counseling, risk assessment, genetic testing and cancer screening recommendations to individuals and families concerned about their personal and family history of cancer. Our board-certified genetic counselor, an expert in cancer risk assessment, helps patients navigate through complex medical information and the practical and ethical implications of genetic testing.

STEREOTACTIC RADIATION THERAPY

In 2016, Shaw's Stereotactic Radiation Therapy program continued to grow, treating sites in both the body (SBRT) and in the brain (SRT). SBRT/SRT is the delivery of very high doses of radiation with sub-millimeter accuracy, often accounting for respiratory and organ motion, to small tumors in the body. The procedure can be used in lieu of surgery for prostate cancer, metastatic brain lesions, liver lesions, early stage lung cancer and other small tumors where surgery is an undesirable or unavailable option. Treatments are accomplished in three to five sessions for Stereotactic Therapy or one treatment for Stereotactic Radiosurgery.

SUMMIT COUNTY CLINIC

Shaw has offered a cancer clinic in Summit County since 2007, and in 2014 we expanded the program to include the Shaw Breast Center and moved to a new space on Main Street in Frisco. The Shaw Breast Center and Cancer Clinic serves Summit County with medical oncology and 3D breast screening services.

PHILANTHROPY

Shaw is fortunate to have the support of several local foundations and groups. In recent years, we've received support from The Sonnenalp of Vail Foundation, The Vail Breast Cancer Awareness Group, The Shaw Outreach Team, Pad the Bra and many individual and family donors.

RURAL CANCER CENTER, BIG CITY SPECIALISTS

SHAW PARTNERS WITH UNIVERSITY OF
COLORADO CANCER CENTER TO OFFER
THE BEST IN CANCER CARE

For over 10 years, Shaw Regional Cancer Center has partnered with physicians and staff at the University of Colorado Cancer Center to enhance access to University specialists and make clinical trials available to patients in the high country.

It's rare to find highly trained cancer specialists, advanced technology and comprehensive treatment plans in a rural setting like Vail, but Shaw Regional Cancer Center boasts all of the above in the peaceful, healing setting of the Rocky Mountains. And, with access to specialty physicians and clinical trials through the partnership with CU Cancer Center, Shaw patients are getting high-quality care that's close to home.

Continued on page 18 ▶

◀ Continued from page 17

Clinical trials are studies that allow patients access to new, more effective methods of treating cancer with chemotherapy, biotherapy or radiation. Many treatments used today are the result of past clinical trials. CU Cancer Center is the only comprehensive cancer center designated by the National Cancer Institute in the Rocky Mountain region, and as a result of the partnership, there are currently about 10 trials available at Shaw.

“While having a cancer center with Shaw’s capabilities in a rural, mountain setting like Vail is unique and a great benefit to our community and region, we don’t have the capability to offer clinical trials on our own,” explains Doris Kirchner, president and CEO of Vail Valley Medical Center, of which Shaw is an outpatient department. “That’s why this relationship with CU is so important. Our medical staff learns new ways to improve health and cancer treatment, and our patients are ensured to receive optimal care.”

Dr. Patti Hardenbergh and Dr. Michael Glode with Mark Kochevar, MBA, associate director for administration and finance at CU Cancer Center

In addition to clinical trials, Shaw physicians — and, in turn, their patients — benefit from multi-disciplinary video tumor boards to discuss interesting and unusual cases. This allows the high country physicians to virtually connect with other rural cancer care teams and specialists from CU. The goal of the tumor boards is to enhance collaboration and education.

“One of the goals of CU Cancer Center is to bring the latest in cancer care and clinical trials to people in remote areas of Colorado,” says Dan Theodorescu, MD, PhD, the director of the CU Cancer Center. “We need hospital partners like Shaw across the state to make this happen. Without their help, we would not be able to share our expertise on this scale.”

THE CANCER CARE TEAMS VISIT ONE ANOTHER ON AN ONGOING BASIS TO STRENGTHEN COMMUNICATION, RELATIONSHIPS AND COLLABORATION.

While Shaw’s specialists have trained at some of the most respected medical and cancer treatment centers in the country, including Duke, Johns Hopkins University, Brown University, University of Colorado and the Dana-Farber Cancer Institute, the partnership has proven valuable.

Michael Glode, MD was the associate director of community engagement for CU Cancer Center and is currently a medical oncology specialist for prostate and genitourinary (GU) cancers at Shaw Regional Cancer Center. “Through our interactions with the colleagues at our affiliate sites,” he explains, “we not only gain knowledge of the challenges and research opportunities we all face, in many cases we also have discovered new ways to approach education and research.”

With the combined expertise of Shaw’s over 30 cancer center staff members and the support of the CU Cancer Center team, those who love the mountains are staying here for treatment, and through clinical trials, could even set new standards for big city cancer centers.

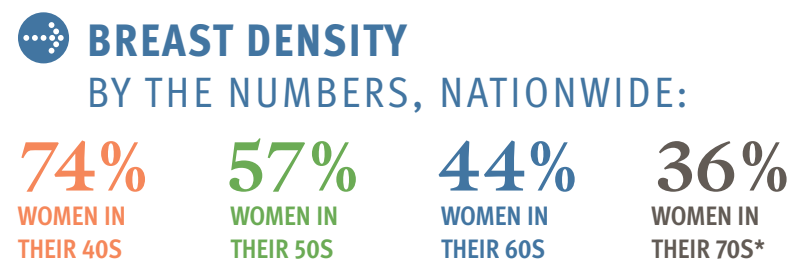

SONNENALP ON THE CUTTING EDGE OF BREAST DIAGNOSTICS

SONNENALP BREAST CENTER'S NEW TECHNOLOGY DRAMATICALLY INCREASES ABILITY TO DETECT CANCER IN DENSE-BREASTED WOMEN

Women hear a lot about mammograms for early detection of breast cancer, but what they may not know is that mammograms can miss 20 percent of cancer in patients with dense breasts. That's why Sonnenalp Breast Center has obtained the latest technology to detect cancer, particularly in women with dense breasts. GE's Advanced Breast Ultrasound (ABUS) is the leading, only FDA-approved, breast ultrasound for detection of cancer in women with dense breasts, and Sonnenalp Breast Center is the only facility in more than a 100-mile range with the new technology.

ADVANTAGES OF NEW TECHNOLOGY

Nationally, approximately 45 percent of women have dense breasts, but in Eagle County, more than 60 percent of women have dense breasts. This makes it difficult to detect cancer with traditional or even 3D mammography. ABUS increases the ability to discover breast cancer from 80 percent with mammography to 94-97 percent with ABUS.

*As women age, breast tissue tends to become more fatty

Though dense tissue is not uncommon — and a perfectly normal attribute, like having brown eyes or blonde hair — it is linked to a four to six times higher risk of developing breast cancer than mostly fatty breasts, according to an article in the New England Journal of Medicine. In addition, mammograms are less effective at showing early cancer tumors in dense-breasted women, because both fibroglandular (dense) breast tissue and masses and lumps appear white on mammograms. As a result, dense breast tissue may mask a lump. Some physicians describe it as looking for a snowball in a snowstorm.

HOW DOES THE TECHNOLOGY WORK?

Once a mammogram detects dense breasts, ABUS screening uses software to reconstruct breast images in a three-dimensional plane, allowing radiologists to see breasts from all aspects. In comparison, older ultrasound screenings presented 300-400 small, square images of the breast.

"We had to scroll through each square of the breast, and it was hard to see where exactly any abnormalities were," says Dr. Monique Fox, a board-certified breast radiologist at Sonnenalp. "It wasn't giving us as much information. ABUS screening takes basic information and presents it in three different planes ... We can see if lesions are real or not and see where they are. It helps us with more problem-solving."

The ABUS procedure is painless, involving lotion and light pressure from the transducer. Patients receive results in one to three days. Between Sonnenalp's 3D mammography and its ultrasounds, detection of Stage One cancer (tumors less than 2 cm large) have increased by 40 percent, and false positives have decreased by a third, Dr. Fox says.

"It's like going from DOS to Microsoft as far as what the software can look at and view," Dr. Fox says. "It's much easier to detect cancer with ABUS."

However, ABUS does not replace mammograms, which physicians and breast experts still recommend receiving annually. ABUS simply complements mammography for women with dense breasts.

"Screening is very important for Eagle County women," Dr. Fox says. "We recommend mammography and ultrasounds every year for women with dense breasts. The population of women diagnosed here is higher than the national average."

Nationwide, women ages 40-44 have a six percent incidence of breast cancer, while residents of Eagle County have a 10-12 percent incidence. In women ages 45-54, the percentages are the same nationally and regionally — 10-12 percent, Dr. Fox says. Physicians aren't sure why more women in the valley present with breast cancer, but they postulate it could be linked to the higher population of younger women.

With ABUS technology, Sonnenalp has become a pioneer in cancer detection, not only in Eagle County, but also along the Front Range; only a couple clinics in the Denver metro area have acquired ABUS. The purchase was made possible by the generosity of The Sonnenalp of Vail Foundation, Vail Breast Cancer Awareness Group and the Shaw Outreach Team.

DIRECTORY

CANCER CARE TEAM

Our cancer treatment team uses a multidisciplinary approach, meeting weekly to discuss each patient's unique case and determine the best course of treatment. The team reviews pathology, radiology and other findings, and our specialists discuss cases from the perspective of their expertise until a treatment plan is agreed upon. The entire cancer care team is dedicated to an individualized cancer care plan, supporting the patient and family through treatment on to survivorship.

MEDICAL SERVICES

BREAST IMAGING & DIAGNOSTICS

SONNENALP BREAST CENTER – EDWARDS

WWW.SHAWCANCERCENTER.COM/EDWARDS | (970) 569-7690

Sonnenalp Breast Center at Shaw Regional Cancer Center offers the most complete and technologically advanced breast imaging services available with the highest level of professional care in comfort and privacy. Services include:

- ▶ 2D and 3D Digital Mammography: Screening and Diagnostic
- ▶ Breast Ultrasound: Ductograms and Cyst Aspirations
- ▶ Breast Biopsy: Ultrasound, Stereotactic and MRI
- ▶ Needle Localizations
- ▶ Breast MRI
- ▶ Breast Imaging Consultations
- ▶ Whole Breast Automated Ultrasound

SHAW BREAST CENTER & CANCER CLINIC – FRISCO

WWW.SHAWCANCERCENTER.COM/FRISCO | (970) 668-6400

Shaw Regional Cancer Center offers our top clinicians and technology in a convenient Main Street Frisco location. Along with the newest 3D mammography in a private setting, a certified breast expert is available for consultations.

CLINICAL TRIALS

Patients at Shaw may have the opportunity to participate in clinical trials, which are studies that allow patients access to new methods of treating cancer. Trials follow guidelines to provide scientifically sound options and ensure the safety of all participants. Trials are available at Shaw through a partnership with the University of Colorado Cancer Center, as well as through national research groups such as the National Cancer Institute and National Institutes of Health.

GENETIC COUNSELING (970) 569-7626

Shaw's expert hereditary cancer specialist evaluates patients' risks by looking at their genes and provides guidance for reducing risks.

IMAGING (970) 569-7690

Shaw Regional Cancer Center boasts some of the most state-of-the-art imaging technologies available. Imaging studies are performed in Edwards, Vail and Frisco and include:

- ▶ 2D and 3D Mammography
- ▶ Breast MRI
- ▶ MRI
- ▶ Breast MRI Biopsy
- ▶ CAT or CT Scan
- ▶ Ultrasounds
- ▶ PET/CT Scan

INSURANCE AND FINANCIAL ASSISTANCE

It is our goal to ease the financial strains of cancer treatment for each of our patients. We are able to provide estimates of anticipated charges through our Insurance Support Team. They can be reached at (970) 777-2902. Our uninsured patients maybe eligible for assistance and can get more information by calling (970) 569-7525.

MAMMO TECH HOTLINE

Shaw's Mammo Tech Hotline at (970) 569-7417 provides access to a certified breast expert, Monday-Friday between 9 AM - 4 PM.

MEDICAL LIBRARY AT SHAW REGIONAL CANCER CENTER

WWW.VVMC.COM/LIBRARY | (970) 569-7607

Free to the public, the Medical Library loans books, journals, magazines, audio books, videos and children's materials, and also offers access to online materials. Shaw is home to the region's only certified medical librarian and offers inter-library loan and document delivery, material loans, databases and over 320 electronic journals.

MEDICAL ONCOLOGY

SHAW REGIONAL CANCER CENTER – EDWARDS

WWW.SHAWCANCERCENTER.COM/EDWARDS | (970) 569-7429

SHAW BREAST CENTER AND CANCER CLINIC – FRISCO

WWW.SHAWCANCERCENTER.COM/EDWARDS | (970) 668-6401

Shaw's medical oncologists specialize in treating cancer using systemic therapy such as chemotherapy or biologic therapy. Chemotherapy uses medication to destroy cancer cells. Often, it is the only treatment necessary; other times, cancer treatment plans may include chemotherapy plus surgery and/or radiation.

Frisco, Colorado

PHARMACIES

ONCOLOGY PHARMACY (970) 569-7624

Shaw Regional Cancer Center's oncology pharmacy reviews chemotherapy regimens and non-chemotherapy medications. The pharmacist is available for all patients who have questions and/or would like to discuss their treatment regimen.

EDWARDS PHARMACY (970) 569-7676

Shaw is also home to the Edwards Pharmacy, located on the main floor of the cancer center. Call for information and to fill prescriptions.

PHYSICAL THERAPY

HOWARD HEAD SPORTS MEDICINE

WWW.HOWARDHEAD.COM | (970) 569-7777

Research has demonstrated that patients who remain physically active while undergoing cancer treatment have fewer negative side effects during radiation therapy and chemotherapy. The physical therapy team at Shaw assists patients in regaining range of motion, reducing lymphedema and developing an exercise plan. Howard Head Sports Medicine provides an integrative physical therapy approach to treating patients during treatment and recovery.

RADIATION ONCOLOGY (970) 569-7429

Shaw treats cancer with a variety of radiation methods based on the cancer type, location and stage. Shaw's state-of-the-art Image Guided Radiation Therapy (IGRT) Linear Accelerator is the most accurate way to deliver Volumetric Modulated Arc Therapy (VMAT) and Intensity Modulated Radiation Therapy (IMRT). Specialized radiation therapies such as Stereotactic Body Radiotherapy (SBRT) and Stereotactic Radiosurgery (SRS) give the team at Shaw the ability to provide radiation therapy as well as anyone else in the country.

SURGERY

MOUNTAIN SURGICAL ASSOCIATES

WWW.VVMC.COM/SURGEONS | (970) 479-5036

With some of the most respected cancer surgeons in Colorado on our team, Shaw is home to Mountain Surgical Associates (MSA). Our surgeons are a part of the Denver Health System and are experts in cancer surgery including breast, colon and rectal, endocrine, lung and melanoma.

VAIL INSTITUTE FOR AESTHETIC AND RECONSTRUCTIVE SURGERY

WWW.VVMC.COM/PLASTICS | (970) 569-7656

When you have been through the fight of your life—a battle with cancer—you want to regain your body image as quickly and safely as possible. Dr. Jeffrey Resnick and his team are recognized for their expertise in reconstructive and cosmetic surgery and use the latest techniques for breast reconstruction.

UROLOGY

COLORADO MOUNTAIN MEDICAL

WWW.CMMHEALTH.COM | (970) 926-6340

ROCKY MOUNTAIN UROLOGY (970) 928-0808

Urological services are provided by both Colorado Mountain Medical and Rocky Mountain Urology's board-certified urologists. In addition to general urology care, the specialists diagnose and treat many conditions of the urinary tract, including enlarged prostate (benign prostatic hyperplasia), kidney stones, prostate cancer, low testosterone, incontinence (including non-surgical options), bladder cancer and more.

Not owned or operated by Vail Valley Medical Center.

AWARDS & ACCREDITATIONS

AMERICAN SOCIETY OF CLINICAL ONCOLOGY QUALITY ONCOLOGY PRACTICE INITIATIVE (QOPI)

Shaw has been recognized with a certification for its commitment to excellence and ongoing quality improvement. Comprised of academic oncologists and quality experts, QOPI incorporates measures and standards based on clinical guidelines and published standards for quality oncology care.

AMERICAN COLLEGE OF SURGEONS COMMISSION ON CANCER

Shaw Regional Cancer Center was awarded the esteemed three-year Commission on Cancer (CoC) accreditation with commendation, one of the highest levels that can be achieved by the survey. Established by the American College of Surgeons, the CoC is a consortium of professional organizations dedicated to improving survival and quality of life for cancer patients through standards-setting, prevention, research, education and the monitoring of comprehensive quality care.

THE AMERICAN COLLEGE OF RADIOLOGY

Sonnenalp Breast Center is an American College of Radiology (ACR) Breast Imaging Center of Excellence. ACR is the country's FDA-approved accrediting body for mammography, and Center of Excellence seal is the highest accreditation achievable by breast imaging centers. We are fully accredited in:

- ▶ Mammography
- ▶ Stereotactic Breast Biopsy
- ▶ Breast Ultrasound
- ▶ Breast Ultrasound Biopsy

THE MAMMOGRAPHY QUALITY STANDARDS ACT

Sonnenalp Breast Center fulfills The Mammography Quality Standards Act, which requires mammography facilities across the nation to meet uniform quality standards.
